TGate
4th Generation

As a leader of Home Automation in india, with more than 20 years of expertise in the space of domestic electricals, Toyama blends its limitless zeal for innovation with strong foundations in manufacturing. This helps us deliver an unrivaled range of breakthrough solutions for tomorrow's needs. Born in the silicon valley of India, we take inspiration from the innovative spark of Bangalore IT industry to indulge in our passion of creating simple to use, inteligent products for smart living.

LIGHTING & CONTROLS

All your appliances are also under your control from your app or through scheduling. Whether it's your coffee machine or your geyser, you can control them and schedule them to be ON when you need them and OFF when you don't.

- Dimming
- Mood lighting
- Curtain / Blind
- AC Control
- Appliances Control
- Scheduling

Turn any combination of lights into mood lighting. At the touch of a button, you can create the desired ambience by turning on certain LED lights and dimming them to the required level. You can even choose different colours for different scenes.

4

ENTERTAINMENT

Control all your IR Remote operated devices throughout your house with our app instead of hunting and shuffling between remotes. From the home theatre systems, to set top boxes, TVs, music systems.

DTH CONTROL

HOME THEATRE CONTROL

TV/PROJECTOR CONTROL

MEDIA CONTROLLER

- DTH Control
- Home Theatre Control
- TV Control
- Set-Top box Control
- Projector Control

THERMOSTAT CONTROL

Toyama thermostats have all the features for your comfort living and energy saving. They are easy to use. You can select the most comfortable temperature and fan speed. You can schedule to switch ON the AC to keep the area cool even before you arrive at the room. Or you can switch it to energy saving mode - higher set temperature - while you are away from the house/office. All these controls you can do on the well lit touch panel of the thermostat or through the App from your smart phone.

Are you away from House/Office?

Control through Smart Phone,

- Comfort living
- Easy to use
- Energy saving
- Touch Control
- App Control

ACCESS CONTROL

The secure wireless biometric door locks enable the regulars to register their fingerprints to ensure seamless but secure entry into the house. With the wireless IP Cameras get a live peek of the visitor on to your smart phone or wall mounted tablet .

Enjoy the convenience of answering the door through your phone to let the visitor in, from the comfort of your couch or wherever you are and whatever you're doing.

VOICE ASSISTANT

Now you can control all your devices at home by simply speaking it out through Alexa or Google.

Different pre configured scenes can be controlled via voice. For example, a good night scene can be triggered by saying, 'good night' that would do multiple things such as turn off certain lights in the house, set it in secure mode, turn ON a corridor light and more. With your virtual assistant, you can set up your home in a number of ways to make it "smarter". It is been a key addition that has made managing a variety of different smart home devices easier.

The companies that have created these assistants have home automation aspirations for all of them, with varying degrees of success. Now that voice recognition and computer language processing have become reliable, the Sci-Fi fantasy of simply asking the computer to do something like open the door or switch on the light has finally come true.

"Alexa"

Hi, how can I help?

"Alexa, Its movie time"

"Hi Google"

Hi, how can I help?

"Its party time"

Always ready, connected & fast.

JUST SPEAK

11

Alexa adds to the level of convenience by adding a fourth way of controlling your home, apart from the app, by touch and by remote.

10

You can schedule your secure mode every night from 10PM-6AM or when you are heading out of your house. When your house is in secure mode, the motion sensor and Gas / Smoke sensors are activated so you'll be alerted immediately if any unauthorised attempts to enter your house are made or any safety breaches.

A COMPLETE SET OF SECURITY DEVICES
