

## Hotel Guest Room

**WIRELESS INTELLIGENT SOLUTIONS**

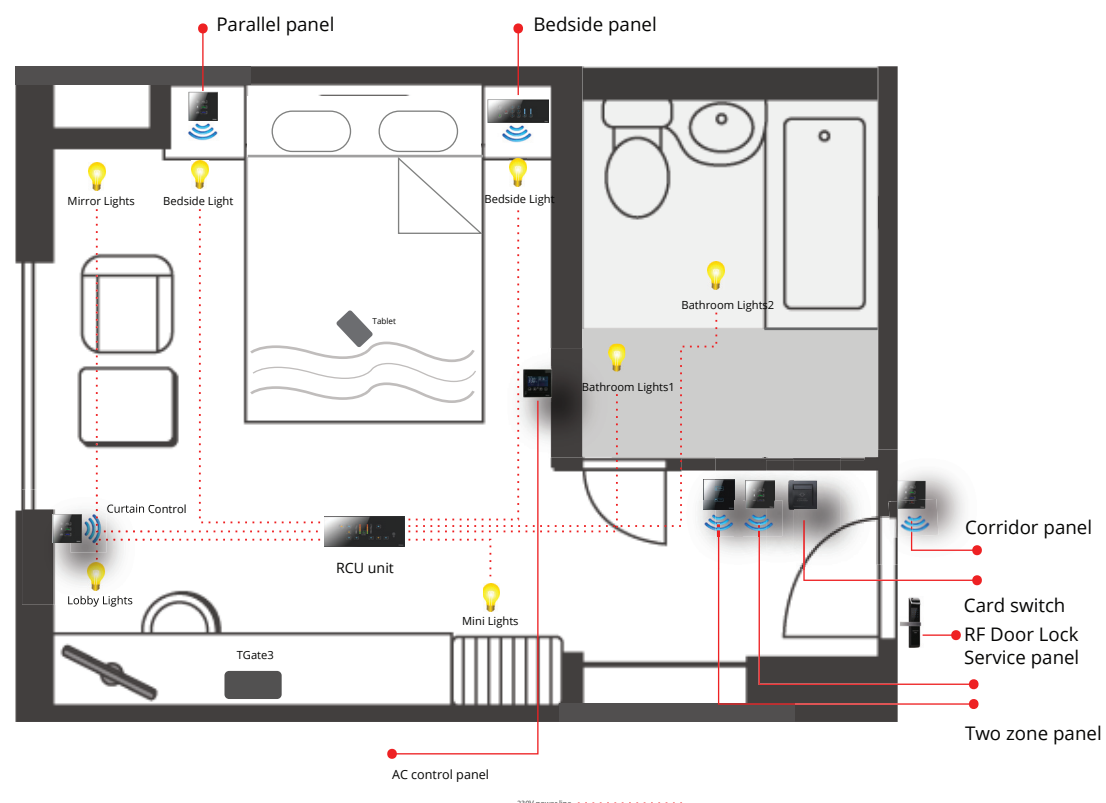

# Sophisticated and simple Guest room solutions

Toyama delivers the emotional impact of lighting for hotel guest rooms through their sophisticated but simple wireless controls, Corridor panels, Key card switches, wall key panels, bedside key panels and temperature controllers..

# Wireless ELV Solutions

- Touch switches can be installed on the wall or in the ceiling
- Toyama robust network ensures smooth control from touch panels
- Toyama wireless protocol ensures communication between all devices
- One touch control for programmable scene: welcome, relax, movie, sleep....
- ipad/smart phones
- Automated Curtain control
- Dual temperature setting for energy saving.

## RF Door Lock

Radio Frequency Identification (RFID) lock use a Key fob or card for entry. With RFID technology ,you maynot have to remove the key fob from your pocket or purse,meaning no more fumbling in the dark or trying to find the keys.

## Touch Service Panel

For the convenience of international guest a simple touch on the well lit icons/words of service panel activates the desired service like Privacy, Room service etc,. The panel gives absolute comfort to the guest by direct activation of corridor panel.

## RFID Key tag switch

When a RFID key card with 13.56MHz normally used to open the room RF door lock is inserted in the pocket of the card switch it powers up all the loads of guest room. Further Welcome lights are turned ON in the room. When the key card is removed from the pocket lights are OFF after a defined delay. Also power is disabled in selected sockets

## Touch Corridor panel

Toyama corridor panels are elegant and are designed to communicate to the floor staff the desired service by the room guest by way of well lit icons/alphabets for the convenience of international guest. Corridor panel indicators come ON only when the guest is inside. They go OFF when the guest removes the card from the switch indicating room is unoccupied.

## AC Temperature controller

This digital controller is engineered with semi conductor temperature sensor and micro controller to ensure the desired or set temperature by the guest is well maintained for a comfortable stay of the guest.

## Touch Bedside panel

These elegantly printed touch key panels with text and icons can be conveniently be mounted on walls or on the bed side. For the convenience of the guest couple if required two bed side panels can be installed; one on Right and the other on Left of the bed performing the same control action. Options are available with standard or programmable keys.

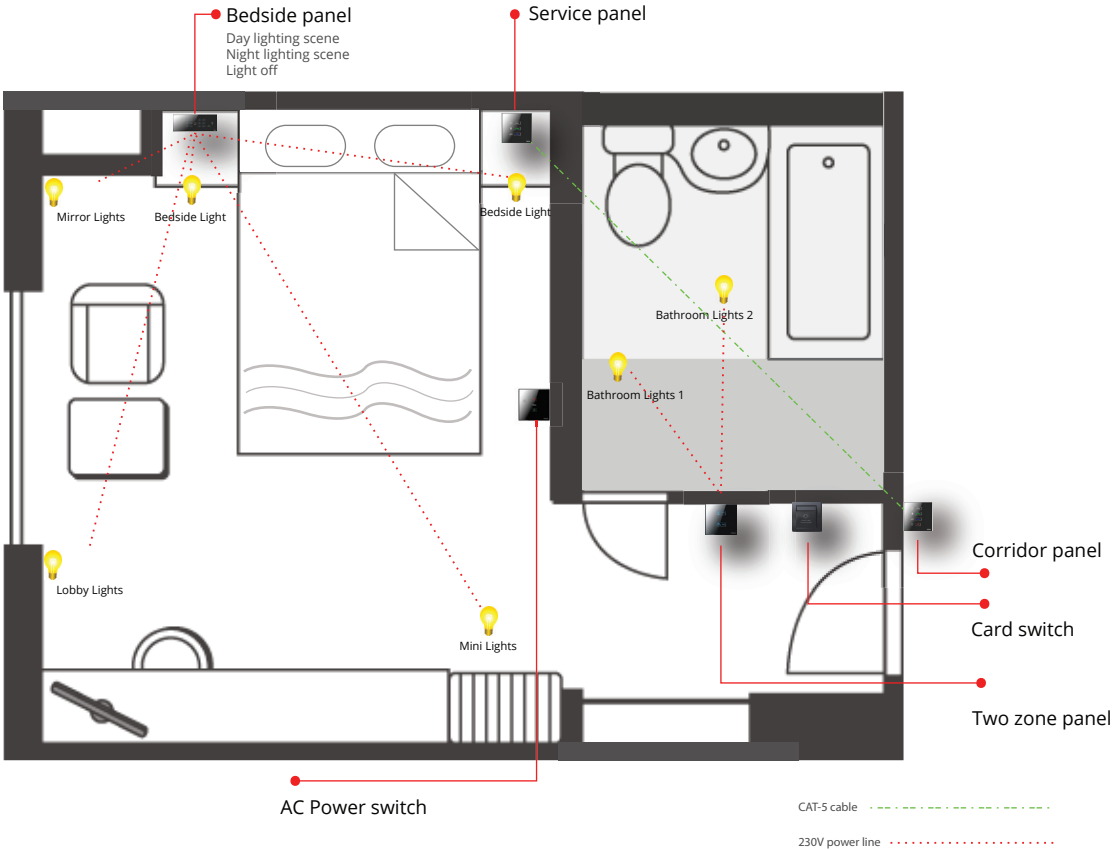

## Room Control Unit (RCU):

Toyama RCU is a compact unit suitable for 8M box for mounting below or above the false ceiling in the guest room. Electrical wiring will be easy and comparatively shorter in lengths. RCU is programmed to send and receive ON/OFF wireless commands from maximum of seven touch key panels for controlling all the connected loads. It is available in configuration of 6 on/off loads and two dimming loads. Based on the requirement the touch key panels, available in 8M or 2M can be selected for one way or two way operations. The communication between RCU and all the Key panels is made through Toyama proprietary wireless protocol which is unique and developed for the first time in the world.

# Wired Touch Solution for Hotels

- Stand alone Scene control switches enable the guest/management to make day or night scenes for one touch operation and comfort of the guest.
- Available in various combinations to suite the needs of all types of hotels
- Unlike the membrane or modular switches which have mechanical life limitations, touch switches offer unlimited life for touch operation just like to-days touch phone.
- Touch switches have scratch proof well lit glass facia, making it easy to locate during nights and also retain glossy surface for ever.
- Requires no special training and is in every respect similar to wiring of a standard modular switch. Designed for installation in standard Indian or British wall boxes.

## Scene Maker for Guest room

2 switches customisable text  
(TH13 102)

Pamper your guests with one touch gorgeous lighting ambience in the room for different occasions and moods of the guest. At the same time it also offers the convenience of individual control of lights.

Touch Remote Scene Maker Switch (5A/200W/220V)
